

Funding and Supporting Organizations

Funding Organizations

Major Program,
the National Natural Science
Foundation of China
(Grant No. 71890970)

The major program "*Theories and Methodologies of Comprehensive Transport System Management for Urban Agglomerations under the New-type Urbanization*", aims to develop the theories and methodologies for China's urban agglomerations, around travel behavior analysis, demand integrated management, system design and operation optimization, risk identification and emergency management, as well as sustainable development of the comprehensive transport systems. The program PI is Prof. Hai-Jun Huang.

School of Economics and
Management,
Beihang University, China

The School of Economics and Management (SEM) at Beihang University, established in 1956, is one of the first eight schools approved for the national key discipline of Management Science & Engineering in China. Based on the interdisciplinary cooperation, the SEM is continuously pushing forward innovative research on frontier and critical issues in China's economy and management as well as national strategic needs. <http://sem.buaa.edu.cn/>
